

## Production and Workover Simulator

This simulator is an example of the expertise Able Technologies has acquired in the development of simulators and control screens.

The system consists of an on screen simulator that mimics a well kill scenario, using reverse circulation flow.

The console connects to the PC and controls various simulated functions.

### Simulator Features

- Runs on standards PCs or Laptops
- Can be used in with or without console
- Easy recalibration

### Console Features

- Controls pump rate and throttle
- Controls sliding sleeve and bottom hole plug
- Controls choke opening
- Powered by 9 volt transformer
